CONTENTS

Figure

3.1 Logical Elements
3.2 Half Adders
3.3 Full Adders
3.4 Subtractors and Adder Subtractor
3.5 Packaged Logical Elements
3.6 Examples with Contracted Symbols

4.1 The Pegasus Store
4.2 Order Code

5.1 The Commutator
5.2 p-Pulse Generator
5.3 p-Pulse Repeaters and Inverters
5.4 The Generation of p-Pulse Groups
5.5 Beat Control

6.1 The Order Register
6.2 Normal Entries to the Order Register
6.3 The Order Register (Internal)
6.4 Function Decoding
6.5 X-digit and M-digit Decoding
6.6 N-Decoding (First Stage)
6.7 N-Decoding (Second Stage)
6.8 Control of Modification
6.9 Repeaters and Inverters for Rhythmic Waveforms and F- and G-Waveforms

7.1 Entries to the Mill
7.2 The Mill Adder-Subtractor and Overflow Sensing

Figure

8.1 Jump-Condition Testing

9.1 Stops
9.2 'Start' Order and Manual Order
9.3 Handkey Circuit

10.1 Ordinary Registers (Block 0)
10.2 Accumulators 2 to 5
10.3 Accumulator 1 and Special Registers
10.4 Output Buses
10.5 Input Bus
10.6 Parity Stops
10.7 Tabulated Details

11.1 Track Selection Decoding
11.2 Track-Selection Controls
11.3 Coincidence Circuit
11.4 Control Circuit for Drum Transfers
11.5 Routing in Drum-Write Orders
11.6 Idealised Waveforms
11.7 Register Selection for Drum Transfers
11.8 Control for Block-Address Punching

12.1 Input from Tape Readers
12.2 Input Tape-Drive Control
12.3 Tape-Punch Control
12.4 External Conditioning

Figure

13.1 Multiplication (Schematic)
13.2 Timing Control for Multiplier-Divider
13.3 Controls for Multiplication
13.4 Accumulator 6 in Multiplication
13.5 Adder-Subtractor and Adders in Accumulator 6
13.6 Accumulator 7 in Multiplication
13.7 Mill Connections for Multiplication

14.1 Division (Schematic)
14.2 Controls for Division
14.3 Accumulator 6 in Division
14.4 Accumulator 7 in Division
14.5 Adder-Subtractor Control for Division

15.1 Storage in Address 6
15.2 Storage in Address 7
15.3 Mill Connections for Justification

16.1 Timing Control for Shifts
16.2 The Mill in Shift Orders
16.3 Controls for Double-Length Shifts
16.4 Accumulator 6 in Shifts
16.5 Accumulator 7 in Shifts

17.1 Hooter-Drive Circuit
17.2 Selector Switches for Engineer's Display
17.3 Monitor Control Circuit
17.4 Order-Number Triggering
17.5 Drum-Address and Multi-Beat Triggering

First issue JUNE 1956
